Emirates — Dangerous Goods Policy

Document Type: Travel Safety and Baggage Policy
Category: Before You Fly
Source: User-provided Emirates webpage content
Purpose: Structured knowledge-base document for an Emirates RAG chatbot

1. Overview

The Emirates Dangerous Goods Policy explains which items passengers can and cannot carry on board or bring into the United Arab Emirates (UAE), including dangerous goods, liquids and substances.

In addition to UAE acceptance rules, certain items—including alcohol, cigarettes, e-cigarettes, perfumes, electronics and medication—may be subject to customs regulations and airport security checks in the country of departure or arrival.

Local government restrictions may also apply.

2. Forbidden Items

Forbidden items are articles or substances that pose health and safety hazards to passengers or may damage the aircraft. These items must not be brought on board.

Passengers should also refer to the Prohibited Articles by EC Aviation Security and check the requirements of the authorities in their departure and destination countries.

Emirates prohibits all smart balance wheels, including those with their lithium batteries removed, as both checked-in and carry-on baggage.

3. Declaring Items Before Arrival in the UAE

Passengers can use the iDeclare app by Dubai Customs to check which goods they may bring into the UAE and declare items in advance.

The app helps passengers identify goods that must be declared when arriving in the UAE.

4. Banned Substances in the UAE

The UAE has a strict, zero-tolerance anti-drugs policy. Airports throughout the UAE conduct thorough searches using highly sensitive equipment.

Travellers entering or transiting through the UAE who possess any amount of illegal drugs may be subject to punishment.

4.1 Bringing Medication into the UAE

Passengers carrying controlled medication into the UAE must apply for approval through the Ministry of Health (MoH) website.

Passengers should:

- Check with their doctor whether their prescribed medication is controlled.
- Carry a prescription for the medication.
- Ensure the quantity does not exceed a maximum three-month supply.

Prescription medication that is not controlled and over-the-counter medication do not require prior approval from the MoH, according to the supplied source.

Before travelling, passengers are strongly advised to check which medications they can bring into the UAE. They may contact the nearest UAE Embassy or Consulate for advice.

5. Dangerous Goods Categories

The supplied Emirates policy organizes items into these categories:

1. Alcohol
2. Batteries, battery-powered devices and power banks
3. Battery-powered wheelchairs, personal motorised vehicles and mobility devices
4. Compressed gas cartridges, cylinders and aerosols
5. Fuel and fuel cartridges
6. Medical items
7. Powder
8. Scientific, professional and personal items
9. Weaponry, ammunition and explosives

The following sections organize the supplied rules by category, including cabin baggage, checked baggage, approval requirements and prohibited items.

6. Alcohol

6.1 Alcoholic Beverages

Alcoholic beverages in retail packaging may be carried when they meet all the following conditions:

- Alcohol concentration is more than 24% but not more than 70% by volume.
- Each receptacle does not exceed 5 litres.
- Total net quantity per passenger does not exceed 5 litres.

Baggage type	Permitted
Carry-on baggage	Yes
Checked baggage	Yes

The supplied policy also notes that customs regulations and airport security checks may apply to alcohol.

7. Batteries, Battery-Powered Devices and Power Banks

7.1 Spare or Loose Batteries

Spare or loose batteries, including lithium-metal and lithium-ion batteries for portable electronic devices, must be carried in carry-on baggage only.

Requirements:

- Each battery must be individually protected against short circuits.
- Each passenger may carry a maximum of 20 spare batteries.
- Power banks are subject to the separate rules below.

Baggage type	Permitted
Carry-on baggage	Yes

Checked baggage	No

7.2 Spare Lithium Batteries Exceeding 100 Wh or 2 g Lithium Content

Spare or loose lithium batteries with the following ratings require special handling:

- Lithium-ion batteries exceeding 100 Wh but not exceeding 160 Wh for consumer electronic devices and Portable Medical Electronic Devices (PMED).
- Lithium-metal batteries with lithium content exceeding 2 g but not exceeding 8 g for PMED only.

Approval status: Needs approval.

A maximum of two spare batteries may be carried in carry-on baggage only. Each battery must be individually protected against short circuits.

7.3 Drones

Drones are not permitted as cabin baggage for safety reasons. They may only be accepted as checked baggage, subject to country-specific rules.

If a drone is included in checked baggage, passengers will be asked to either:

- Secure the lithium batteries within the drone; or
- Remove the batteries and carry them in cabin baggage.

This rule applies even if another airline on the passenger's connecting itinerary has accepted drones as cabin baggage.

Baggage type	Permitted
Carry-on baggage	No
Checked baggage	Yes

7.4 Lithium Batteries in Portable Electronic Devices

Portable electronic devices containing lithium-metal or lithium-ion batteries may be carried for personal use. Examples include:

- Portable oxygen concentrators (POCs)
- Cameras
- Mobile phones
- Laptops
- Tablets

Limits:

- Lithium-metal battery lithium content must not exceed 2 g.
- Lithium-ion battery rating must not exceed 100 Wh.
- Each passenger may carry a maximum of 15 personal electronic devices (PEDs).
- Personal electronic devices should be packaged separately and must not be taped or attached to another electrical item.

Authorities may confiscate items that are packaged incorrectly or if the number of devices exceeds 15 per passenger.

Baggage type	Permitted
Carry-on baggage	Yes
Checked baggage	Yes

7.5 Lithium Batteries in Security-Type Equipment

Security-type equipment containing lithium batteries can only be accepted in consultation with Group Security.

Approval status: Needs approval.

7.6 Lithium Battery-Powered Electronic Devices Exceeding Standard Limits

The supplied policy lists the following devices as requiring approval:

- Portable electronic devices, including medical devices, with lithium-ion batteries exceeding 100 Wh but not exceeding 160 Wh.
- Portable medical electronic devices with lithium-metal batteries containing more than 2 g but not more than 8 g of lithium.

Approval status: Needs approval.

7.7 Portable Electronic Devices Containing Non-Spillable Batteries

Portable electronic devices containing non-spillable batteries must meet IATA Dangerous Goods Regulations Special Provision A67.

The batteries must:

- Have a voltage not exceeding 12 volts.
- Have a rating not exceeding 100 Wh.
- Meet the applicable IATA requirements.

A maximum of two spare batteries may be carried.

Baggage type	Permitted
Carry-on baggage	Yes
Checked baggage	Yes

7.8 Power Banks

A power bank is a device whose primary purpose is to charge or power other electronic equipment.

Rules:

- Each passenger may carry one power bank.
- The power bank must have a maximum capacity of 100 Wh.
- Its capacity rating must be clearly visible.
- Power banks are permitted in cabin baggage only.
- Power banks are prohibited in checked baggage.

- Using a power bank to charge electronic devices on board is prohibited.
- Charging the power bank using the aircraft's onboard power supply is prohibited.
- A power bank must not be placed in the overhead compartment.
- It must be securely stored in the seat pocket or in a bag under the seat in front of the passenger so it remains accessible.

Baggage type	Permitted
Carry-on baggage	Yes
Checked baggage	No

7.9 Smart Baggage with Removable Batteries

Smart bags may be carried in the cabin if the battery is removable and the bag meets the cabin baggage size and weight limits for the route.

Requirements:

- The battery must have a maximum capacity of 100 Wh.
- The battery must be removed from the bag and stored in the seat pocket or in a bag under the seat in front of the passenger.
- The battery must not be placed in the overhead locker.
- The bag must meet the applicable baggage size and weight limits.

Smart bags may also be checked in if the battery is removed and carried in the cabin.

If the smart bag exceeds the route's baggage size or weight limits, or if the battery cannot be removed, it cannot be carried on an Emirates flight.

Different restrictions apply to smart bags that operate as motorised rideable scooters. See Section 8.4.

Additional source-specific guidance: The supplied content also states that a removable smart-bag battery may remain in the bag for cabin carriage if the bag is completely powered off. The bag cannot be charged on board. For checked baggage, the battery must be removed and carried in the cabin. Smart bags with non-removable built-in batteries are prohibited in both the cabin and checked baggage.

7.10 E-cigarettes and Personal Vaporizers

E-cigarettes, including e-cigars, e-pipes, electric portable incense or perfume burners, and other personal vaporizers containing batteries, must be individually protected to prevent accidental activation.

Baggage type	Permitted
Carry-on baggage	Yes
Checked baggage	No

8. Battery-Powered Wheelchairs, Personal Motorised Vehicles and Mobility Devices

8.1 Mobility Devices with Non-Spillable Batteries

Battery-powered wheelchairs and similar mobility devices with non-spillable wet batteries, or batteries complying with IATA Dangerous Goods Regulations Special Provision A123 or A199, may be accepted subject to approval.

Conditions include:

- The batteries must be protected against short circuits, for example by being enclosed in a battery container.
- The battery must be securely attached to the wheelchair or mobility aid.

Approval status: Needs approval. Contact Emirates.

8.2 Mobility Devices with Spillable Batteries or Lithium Batteries

Battery-powered wheelchairs or similar mobility devices with spillable batteries or lithium batteries may be accepted subject to approval and applicable restrictions.

Conditions include:

- The wheelchair or mobility aid must be capable of being loaded, stowed, secured and unloaded while remaining upright.
- If these conditions are met, the battery may remain installed in the wheelchair.
- Battery terminals must be protected against short circuits, for example by being enclosed in a battery container.
- The battery must be securely attached to the wheelchair or mobility aid.
- Additional restrictions apply to lithium batteries.

Passengers are advised to make advance arrangements with Emirates.

Approval status: Needs approval. Contact Emirates.

8.3 Collapsible Mobility Aids with Lithium-Ion Batteries

For collapsible battery-powered mobility aids with lithium-ion batteries:

- The battery must be removed and carried in the cabin.
- A single battery must not exceed 300 Wh.
- For a device requiring two batteries for operation, each battery must not exceed 160 Wh.
- A maximum of one additional spare battery rated at no more than 300 Wh may be carried.
- Alternatively, passengers may carry two spare batteries, each rated at no more than 160 Wh.

Approval status: Needs approval. Contact Emirates.

8.4 Personal Motorised Vehicles

Emirates does not accept personal motorised vehicles because they contain large lithium batteries.

Examples include:

- Smart bags that operate as motorised rideable scooters
- Hoverboards
- Mini-Segways

These items are prohibited as both checked baggage and hand luggage. The restriction applies even when another airline on the itinerary has accepted them.

Baggage type	Status

Carry-on baggage	Forbidden
Checked baggage	Forbidden

The supplied policy also explicitly prohibits all smart balance wheels, even if their lithium batteries have been removed.

9. Compressed Gas Cartridges, Cylinders and Aerosols

9.1 Avalanche Rescue Backpacks

One avalanche rescue backpack per person may be permitted, subject to approval.

The backpack may contain:

- One cartridge of compressed gas in Division 2.2.
- A pyrotechnic trigger mechanism containing no more than 200 mg net of Division 1.4S, if fitted.

Requirements:

- The backpack must be packed to prevent accidental activation.
- Its airbags must have pressure-relief valves.

Approval status: Needs approval.

9.2 Small Non-Flammable Gas Cartridges

Small non-flammable gas cartridges containing carbon dioxide or another suitable Division 2.2 gas may be permitted under specified limits.

The supplied policy allows:

- Up to two small cartridges fitted into a self-inflating safety device, such as a lifejacket or vest.
- No more than two such devices per customer.
- Up to two spare small cartridges per person.
- For other devices, no more than four cartridges, each with a water capacity of up to 50 ml.

Approval status: Needs approval. Contact Emirates.

9.3 Hair Curlers Containing Hydrocarbon Gas

One hair curler containing hydrocarbon gas may be carried per passenger or crew member, provided that its safety cover is securely fitted over the heating element.

Conditions:

- The hair curler must not be used on board the aircraft.
- Gas refills are prohibited in both checked and carry-on baggage.

Baggage type	Permitted
Carry-on baggage	Yes
Checked baggage	Yes

9.4 Non-Flammable, Non-Toxic Aerosols in Division 2.2

Non-flammable, non-toxic aerosols in Division 2.2, with no subsidiary risk, may be carried for sporting or home use.

The combined total net quantity of non-radioactive medicinal or toiletry articles and qualifying aerosols must not exceed:

- 2 kg or 2 litres in total.
- 0.5 kg or 0.5 litres for any individual article.

Aerosol release valves must be protected by a cap or another suitable method to prevent accidental release.

Baggage type	Permitted

Carry-on baggage	No
Checked baggage	Yes

10. Fuel and Fuel Cartridges

10.1 Camping Stoves and Fuel Containers

Camping stoves and fuel containers that have contained flammable liquid fuel may be carried only if the fuel tank and/or container is completely drained of all liquid fuel and measures have been taken to eliminate the danger.

Approval status: Needs approval.

10.2 Fuel Cells

Fuel cells containing fuel and powering portable electronic devices, such as cameras, mobile phones, laptops and camcorders, are listed as permitted in cabin baggage.

Baggage type	Permitted
Carry-on baggage	Yes
Checked baggage	No

10.3 Spare Fuel-Cell Cartridges

Spare fuel-cell cartridges for portable electronic devices are listed as permitted in both carry-on and checked baggage.

Baggage type	Permitted
Carry-on baggage	Yes
Checked baggage	Yes

10.4 Internal Combustion or Fuel-Cell Engines

Internal combustion or fuel-cell engines must comply with IATA Dangerous Goods Regulations Special Provision A70. The engine must be free of any fuel used to power it.

Baggage type	Permitted
Carry-on baggage	No
Checked baggage	Yes

11. Medical Items

11.1 Insulated Packaging Containing Refrigerated Liquid Nitrogen

Dry shippers containing refrigerated liquid nitrogen may be carried in cabin and checked baggage if:

- The liquid nitrogen is fully absorbed in a porous material.
- The packaging contains only non-dangerous goods.

Baggage type	Permitted
Carry-on baggage	Yes
Checked baggage	Yes

11.2 Oxygen or Air Cylinders for Medical Use

Gaseous oxygen or air cylinders required for medical use require approval.

- The cylinder must not exceed 5 kg gross weight.
- Liquid oxygen systems are prohibited for transport.

Approval status: Needs approval.

11.3 Radioisotopic Cardiac Pacemakers

Radioisotopic cardiac pacemakers and other devices containing radioactive material may be carried when implanted in or fitted externally to a person. This includes devices powered by lithium batteries and radiopharmaceuticals contained within a person's body as a result of medical treatment.

Baggage type	Permitted
Carry-on baggage	Yes
Checked baggage	Yes

11.4 Non-Infectious Specimens

Non-infectious specimens packed in small quantities of flammable liquid must comply with IATA Dangerous Goods Regulations Special Provision A180.

The applicable special packaging requirements are available in the IATA Dangerous Goods Regulations.

Baggage type	Permitted
Carry-on baggage	Yes
Checked baggage	Yes

11.5 Mercury-Filled Thermometers or Barometers

A mercury-filled thermometer or barometer carried by a representative of a government weather bureau or a similar official agency requires approval.

The instrument must be packed in strong outer packaging with a sealed inner liner or a strong, leak-proof and puncture-resistant bag that is impervious to mercury. The packaging must prevent mercury from escaping regardless of its position.

Approval status: Needs approval.

11.6 Medical or Clinical Thermometers Containing Mercury

One medical or clinical thermometer containing mercury may be carried per person for personal use, provided it is kept in its protective case.

Baggage type	Permitted
Carry-on baggage	No

Checked baggage	Yes

12. Powder-Like Substances

Additional security screening applies to flights to, through or from the United States, and flights from or through Australia and New Zealand.

These measures follow security guidelines from the US Transportation Security Administration (TSA), the Australian Government's Department of Home Affairs and the Civil Aviation Authority of New Zealand.

12.1 Powder Restrictions for Flights to the United States

Under the directive described in the supplied policy:

- Powder-like substances in containers equal to or greater than 350 ml/grams must be placed in checked baggage.
- These substances are not allowed in carry-on belongings or cabin baggage.
- Items may be confiscated at Dubai (DXB), Milan (MXP) and Athens (ATH), depending on the last point of departure.
- Powder-like substances below 350 ml/grams may be subject to additional screening.
- Baby formula, prescription medicines and human remains are exempt.
- Powder-like substances purchased from airport duty-free shops must be placed in Sealed Tamper Evident Bags (STEBs) with proof of purchase.

Baggage type	Permitted for restricted powder containers
Carry-on baggage	No
Checked baggage	Yes

These rules are presented as stated in the supplied source. Passengers should confirm current screening requirements for their itinerary.

13. Scientific, Professional and Personal Items

13.1 Security-Type Attaché Cases

Security-type attaché cases, cash boxes and cash bags containing dangerous goods, such as lithium batteries or pyrotechnic material, are forbidden unless authorized by the airline.

Baggage type	Status
All baggage types	Forbidden unless authorized

13.2 Chemical Agent Monitoring Equipment

Chemical Agent Monitoring Equipment containing radioactive material may be accepted under specific conditions.

The equipment must:

- Remain within the activity limits specified in IATA Dangerous Goods Regulations Table 10.3.C.
- Be securely packed.
- Contain no lithium batteries.
- Be carried by staff members of the Organisation for the Prohibition of Chemical Weapons (OPCW) on official travel.

Approval status: Needs approval.

13.3 Dry Ice

Dry ice (solid carbon dioxide) may be carried in quantities not exceeding 2.5 kg per person when used to pack perishables that are not subject to the relevant dangerous goods regulations.

Conditions:

- The baggage or package must allow carbon dioxide gas to escape.
- Checked baggage must be marked “dry ice” or “carbon dioxide, solid”.
- The net weight of dry ice must be indicated, or the baggage must state that it contains 2.5 kg or less.

Approval status: Needs approval.

13.4 Heat-Producing Articles

Battery-powered equipment capable of generating extreme heat, which could cause a fire if activated, requires approval.

Examples include:

- Underwater torches or diving lamps
- Soldering irons

The heat-producing component must be packed separately to prevent activation during transport. Any removed battery must be protected against short circuits.

Approval status: Needs approval.

13.5 Energy-Efficient Lamps

Energy-efficient lamps in retail packaging intended for personal or home use may be carried in both cabin and checked baggage.

Baggage type	Permitted
Carry-on baggage	Yes
Checked baggage	Yes

13.6 Safety Matches and Small Cigarette Lighters

One small packet of safety matches or one small cigarette lighter may be carried on the person's body for individual use, provided the lighter does not contain unabsorbed liquid fuel other than liquefied gas.

The following are not permitted:

- Lighter fuel
- Lighter refills

- “Strike anywhere” matches
- Blue-flame lighters
- Cigar lighters

Lighter fuel and refills are prohibited both on the person's body and in checked or carry-on baggage.

The supplied policy lists the category as forbidden under its general baggage classification. The item-specific description provides the conditions above for the limited allowance.

13.7 Non-Radioactive Medicinal or Toiletry Articles

Non-radioactive medicinal or toiletry articles, including aerosols, may include:

- Hair sprays
- Perfumes
- Colognes
- Medicines containing alcohol

The combined total net quantity of these articles and non-flammable, non-toxic Division 2.2 aerosols must not exceed:

- 2 kg or 2 litres in total
- 0.5 kg or 0.5 litres per individual article

Aerosol release valves must be protected with a cap or another suitable method to prevent accidental release.

Baggage type	Permitted
Carry-on baggage	Yes
Checked baggage	Yes

13.8 Permeation Devices

Permeation devices used to calibrate air-quality monitoring equipment must comply with IATA Dangerous Goods Regulations Special Provision A41, which specifies packaging requirements.

Baggage type	Permitted
Carry-on baggage	No
Checked baggage	Yes

14. Weaponry, Ammunition and Explosives

14.1 Ammunition

Ammunition for weapons may be carried subject to approval when securely packaged and limited to Division 1.4S, UN 0012 or UN 0014.

The supplied policy specifies:

- A maximum gross weight of 5 kg per person for personal use.
- Allowances for multiple people must not be combined into one or more packages.

Approval status: Needs approval.

14.2 Disabling Devices

Disabling devices containing irritant or incapacitating substances, including mace and pepper spray, are forbidden:

- On the person's body
- In checked baggage
- In carry-on baggage

Status: Forbidden.

14.3 Electroshock Weapons

Electroshock weapons, such as Tasers, containing dangerous goods—including explosives, compressed gases or lithium batteries—are forbidden:

- On the person's body

- In checked baggage
- In carry-on baggage

Status: Forbidden.

14.4 Items Containing Explosives

Fireworks and other items containing explosives are prohibited in both carry-on and checked baggage.

Examples include:

- Christmas crackers
- Firecrackers
- Bottle rockets
- Poppers
- Sparklers

Status: Forbidden.

15. Prohibited Articles by EC Aviation Security

The supplied policy includes a list of articles prohibited in security-restricted areas and on board an aircraft, as well as a separate list of prohibited articles in hold baggage.

15.1 Passengers and Cabin Baggage

Passengers are not permitted to carry the following articles into security-restricted areas or on board an aircraft.

A. Guns, Firearms and Devices That Discharge Projectiles

These include devices capable of, or appearing capable of, causing serious injury by discharging a projectile:

- Firearms of all types, including pistols, revolvers, rifles and shotguns
- Toy guns, replicas and imitation firearms that could be mistaken for real weapons
- Firearm components, excluding telescopic sights
- Compressed-air and CO_2 guns, including pellet guns and ball-bearing guns
- Signal flare pistols and starter pistols
- Bows, crossbows and arrows
- Harpoon guns and spear guns
- Slingshots and catapults

B. Stunning Devices

These include devices specifically designed to stun or immobilise:

- Shock devices, including stun guns, Tasers and stun batons
- Animal stunners and animal killers
- Disabling or incapacitating chemicals, gases and sprays, including mace, pepper spray, capsicum spray, tear gas, acid spray and animal-repellent spray

C. Objects with Sharp Points or Sharp Edges

Objects capable of causing serious injury include:

- Axes, hatchets and cleavers
- Ice axes and ice picks
- Razor blades
- Box cutters
- Knives with blades longer than 6 cm
- Scissors with blades longer than 6 cm, measured from the fulcrum
- Martial arts equipment with sharp points or edges
- Swords and sabres

D. Workmen's Tools

Tools capable of causing serious injury or threatening aircraft safety include:

- Crowbars
- Drills and drill bits, including cordless portable power drills
- Tools with blades or shafts longer than 6 cm that could be used as weapons, such as screwdrivers and chisels
- Saws, including cordless portable power saws
- Blowtorches
- Bolt guns and nail guns

E. Blunt Instruments

Objects capable of causing serious injury when used to strike include:

- Baseball and softball bats
- Clubs and batons, including billy clubs, blackjacks and nightsticks
- Martial arts equipment

F. Explosives and Incendiary Substances or Devices

These include items capable of causing serious injury or threatening aircraft safety:

- Ammunition
- Blasting caps

- Detonators and fuses
- Replica or imitation explosive devices
- Mines, grenades and other explosive military stores
- Fireworks and other pyrotechnics
- Smoke-generating canisters and cartridges
- Dynamite, gunpowder and plastic explosives

15.2 Hold Baggage

Passengers are not permitted to carry the following explosives and incendiary substances or devices in hold baggage:

- Ammunition
- Blasting caps
- Detonators and fuses
- Mines, grenades and other explosive military stores
- Fireworks and other pyrotechnics
- Smoke-generating canisters and cartridges
- Dynamite, gunpowder and plastic explosives

16. Firearms, Weapons and Ammunition on Emirates Flights

The supplied policy states that firearms, weapons and ammunition may be carried as checked baggage on Emirates flights under specific conditions.

Passengers must:

1. Possess the original firearms licence in their name.
2. Carry all original documents confirming the necessary clearances and permissions to export or import firearms, weapons and ammunition, where applicable.
3. Obtain Emirates' approval at least three days before the flight.
4. Complete the Firearms Form through the Emirates Help Centre to begin the approval process.
5. Allow additional time for public holidays and weekends in their country of residence and the UAE.
6. Ensure the firearm is completely unloaded and, if possible, dismantled and packed inside a suitcase or standard gun case.
7. Store ammunition securely in a strong, sealed box packed inside a suitcase and surrounded by other contents.
8. Ensure the suitcase does not bear an “Explosive” label.

The maximum gross ammunition weight per customer is 5 kg (11 lb). Customers travelling in groups must carry ammunition in separate bags, with no individual bag exceeding the limit.

16.1 Additional Conditions for Flights Into or Through Dubai

- Customers bringing firearms and ammunition into the UAE must obtain prior clearance from UAE Customs and the UAE Ministry of Defence.
- Customers must contact these government departments directly.
- Transfer and transit passengers connecting to onward flights must obtain prior clearance from the Dubai Airport Police Department and the Department of Civil Aviation.

Important: These conditions do not override the separate prohibitions on explosives and other prohibited articles.

17. Smart Baggage

Smart or innovative baggage may contain features such as:

- Motors
- Power banks
- GPS
- GSM
- Bluetooth
- RFID
- Wi-Fi technology

Restrictions apply to smart bags containing lithium batteries.

17.1 Cabin Baggage

Smart bags that meet the cabin baggage size and weight allowance for the route may be carried in the cabin if the battery is removable.

The supplied policy also states that the battery may remain in the bag if the bag is completely powered off. The bag cannot be charged on board.

See the Cabin Baggage Allowance FAQ.

17.2 Checked Baggage

Smart bags may be checked in if:

- The battery is removed.
- The removed battery is carried in the cabin.
- The bag meets the route's checked baggage size and weight limits.

Smart bags with built-in batteries that cannot be removed are prohibited in both cabin and checked baggage.

See the Checked Baggage Allowance FAQ.

For the complete list of prohibited items, see the Emirates Dangerous Goods Policy.

18. Zamzam Water for Haj or Umrah

For passengers travelling to perform Haj or Umrah, the supplied content states that passengers whose itinerary includes Madinah or Jeddah may pack up to five litres of Islamic Holy Water of Zamzam in addition to their checked baggage allowance.

Conditions:

- The Zamzam water must be appropriately packaged in a sealed container.
- It will be transported in a special area of the aircraft's cargo hold.

19. Important Policy Notes

- Dangerous goods acceptance may depend on the country of departure, destination, transit airport and local regulations.
- Some items require advance approval from Emirates.
- Lithium batteries, power banks and battery-powered devices have specific restrictions.
- Items classified as forbidden must not be carried, even if they are normally used for personal purposes.
- Passengers should verify current requirements with Emirates and relevant authorities before travelling.
