Emirates — Special Assistance and Requests

1. Medicine Onboard and Transportation

1.1 What if I have special medications that I must carry with me?

Passengers who require special medication should always carry their prescription when boarding a flight.

Medication storage guidelines:

- Personal medication cannot be stored in the aircraft galley chillers.
- Medication requiring temperature-controlled storage should be packed in a medically approved insulated container or pouch.
- Cabin crew can provide ice on request to help keep the container chilled throughout the flight.
- Passengers should consider carrying an extra supply of medication because some countries have limited availability for prescription refills.

Country-specific medication requirements:

Different countries have different laws governing the possession and importation of prescription drugs.

Passengers should consult their physician and contact the local embassy of their destination country for information about specific medications.

2. Service Animals

2.1 Can my service animal travel with me?

Certain service animals are permitted to travel in the cabin on Emirates flights, subject to specific conditions.

For details about travelling with a service animal, passengers should consult Emirates' Accessible Travel information or contact their local Emirates office.

2.2 Travelling to and from the USA with a service animal

Requirements depend on the direction of travel.

- Travelling to the USA: Passengers must comply with both US Department of Transportation (DOT) regulations and Centers for Disease Control and Prevention (CDC) regulations.
- Departing from the USA: Passengers must comply with US Department of Transportation regulations.

Required forms

Passengers must complete the US Department of Transportation Service Animal Air Transportation Form before travelling. The form confirms the animal's health, training, and behaviour.

For flights longer than eight hours, passengers must also submit the US Department of Transportation Service Animal Relief Attestation Form. This confirms that the dog will not relieve itself on the aircraft or can do so in a sanitary manner.

Completed forms must be submitted to Emirates' Special Assistance team for review. Emirates will contact passengers to confirm validation before travel.

CDC dog-import requirements

From 1 August 2024, the supplied source describes the following requirements for bringing dogs into the USA:

- Health and documentation: Specific vaccination and health certification requirements must be met.
- Required form: All travellers bringing dogs into the USA must complete a CDC Dog Import Form.
- Country restrictions: Additional restrictions apply to dogs vaccinated in foreign countries and arriving from countries classified as high-risk for rabies.
- Entry points: Certain dogs entering from specified countries may only be imported through designated ports of entry.

Passengers should consult the CDC Dog Import Regulations for detailed requirements.

2.3 Travelling to Dubai with a service dog

Customers travelling with a service dog from an eligible station to Dubai must submit the required documents at least four working days before departure for validation by the UAE Ministry of Climate Change and Environment (MOCCAE).

Required documents:

1. Veterinary health certificate from the country of origin.

2. Rabies titre test (RNAT).
3. Animal vaccination book and treatment documents.
4. Import permit from MOCCAE.
5. Receipts for inspection and release fees paid according to the MOCCAE website.

Booking confirmation: The service-dog booking is confirmed only after MOCCAE has validated the documents.

Passengers must submit the required documents through the relevant Emirates process.

3. Special Assistance

3.1 Unaccompanied Minors

Can my child travel alone on an Emirates flight?

Yes. Emirates offers an Unaccompanied Minors service for children travelling alone.

Child's age	Service and fare rules
5–11 years	Can use the Unaccompanied Minors service and must travel on an adult fare
12–15 years	Can request the paid Unaccompanied Minors service
Over 12 years	Can travel alone on an adult fare without the service, subject to applicable requirements

The paid service for young passengers aged 12–15 costs USD 50 per passenger for each leg of the journey.

The service is intended to support children from check-in until they meet their parent or guardian at the destination.

Children travelling in a different cabin class

Children up to 11 years old travelling in a different cabin class from their parent or guardian on the same flight must travel on an adult fare.

They are still considered accompanied but cannot access the children's lounge and special services.

Children aged 5–11 travelling in a different cabin class from their parent or guardian are considered unaccompanied minors unless they travel in the same cabin class as a passenger over 16 years old.

What if my child has a connecting flight or overnight transfer?

Maximum connection times:

Connection type	Maximum connection time
Transfer to another airline	4 hours
Transfer to another Emirates flight in Dubai	8 hours

These limits apply to the unaccompanied-minor arrangements described by Emirates.

Overnight transfers and airport changes:

A child under 16 cannot travel alone if the transfer requires an overnight stay at the connecting airport or travel between airports to catch a connecting flight, unless an adult guardian is arranged to meet and care for the child at the transit point.

These arrangements must be confirmed with Emirates before the child can be accepted for travel.

Special assistance for children

A child who requires special assistance or specific care during the journey must be accompanied by a fare-paying guardian aged over 16.

Unaccompanied-minor terms and conditions

- A parent or legal guardian must complete and sign a Declaration of Indemnity form before the child can travel.
- These forms are available at Emirates Airport Offices.
- The parent or guardian must remain at the airport until the flight has departed.
- The person collecting the child at the destination must provide proof of identification.
- Emirates offers its Unaccompanied Minors service only on Emirates flights, not on partner airlines.

Passengers travelling on other airlines should check the relevant airline's rules for children travelling alone.

Special travel-document requirements for minors

French minors travelling outside France

French citizens travelling outside France without a parent or legal guardian must carry:

- An official authorisation to leave the country.
- Their passport.
- A copy of the identification document belonging to the parent or guardian who signed the authorisation.

The original authorisation must be presented.

Spanish minors travelling outside Spain

Spanish minors under 18 travelling outside Spain without a legal representative must carry a signed declaration permitting travel outside the national territory, in addition to their passport.

The form may be obtained from the Spanish Police, Civil Guard, courts, notaries, town halls, or consulates.

Foreign minors departing Spain must carry their national passport or another valid travel document. Foreign minors resident in Spain or another EU state should consult the relevant authorities about applicable documentation.

Unaccompanied minors travelling to Canada

Air Canada does not accept unaccompanied minors from other airlines. Therefore, children using Emirates' Unaccompanied Minors service can travel as far as Toronto, where a parent or guardian must collect them.

Children travelling to Canada alone or with an adult who has no legal custody over them are strongly advised to carry a travel consent letter signed by their legal guardian or a parent with legal custody.

The letter should include:

- Authorisation to travel.
- The destination in Canada and the duration of the child's stay.
- The address and telephone number of the legal parent or guardian.

Italian minors travelling outside Italy without an adult

Italian nationals aged 13 or younger must carry a letter of authorisation, called a dichiarazione di affido, from the local police (questura) if they are:

- Travelling alone.
- Travelling with someone who is not their parent or legal guardian as identified in their passport.

Passengers living abroad can obtain the authorisation from an Italian embassy or consulate. Airport police cannot issue it.

Without this authorisation, the child will not be permitted to leave Italy. The requirement described in the source applies to Italian citizens.

Minors under 14 travelling to or from Vietnam

Children under 14 must be accompanied by a parent or legal guardian. If travelling with someone else, they must carry the required authorisation letter.

Child's nationality	Arrival in Vietnam	Departure from Vietnam
Vietnamese children	Authorisation letter not required	Authorisation letter required; it must be certified by local police or the Ho Chi Minh City Department of Justice
Non-Vietnamese children	Authorisation letter required; it must be certified by their local authorities	Authorisation letter not required

Children travelling under Emirates' Unaccompanied Minors service are exempt because the Unaccompanied Minors form is treated as an authorisation document.

All minors travelling from the Netherlands

All children under 18, regardless of nationality, must have parental authority to depart from the Netherlands if travelling:

- Unaccompanied.
- With only one parent.
- With an adult who does not have parental authority.

The child must carry a Consent Letter for Minors Travelling Abroad from the parent or guardian with parental authority.

Further information is available from the Royal Netherlands Marechaussee.

Travelling on other airlines

Each airline has its own rules for unaccompanied minors. If an itinerary includes another airline, passengers should check that airline's requirements before booking, particularly for connecting flights.

3.2 Travelling with Young Children and Infants

What are the rules for passengers travelling with young children and infants?

Infants under two years old

An infant under two can travel on an adult's lap.

- Emirates provides an infant seat-belt extension.
- The infant must be secured using the extension during taxiing, take-off, landing, turbulence, and whenever the seat-belt sign is illuminated.
- If an infant has been assigned a seat but does not have an approved car seat, the parent or guardian must hold and secure the infant on their lap using the infant seat-belt extension during the relevant safety periods.

Travelling with two or more infants

When travelling with two infants:

- One infant must be carried on an adult's lap using an infant seat-belt extension.
- The second infant must occupy an aircraft seat and be secured using an approved Child Restraint Device (CRD).
- The second infant travels on the applicable child fare.

Alternatively, both infants may occupy aircraft seats.

Three infants may travel with two adults if each adult carries one infant on their lap and the third infant occupies a separate seat secured using an approved CRD. The third infant is charged the applicable child fare.

An approved CRD includes an aviation-approved car seat or safety harness.

Using baby car seats on board

Infants assigned their own seats must be secured in a suitable car seat or safety harness, referred to as a Child Restraint Seat (CRS) or Child Restraint Device (CRD).

The device must display a label confirming approval for aircraft use by one of the following:

- Joint Aviation Authorities (JAA).
- United States Federal Aviation Administration (FAA).
- Transport Canada.

Installation requirements:

- The passenger is responsible for installing the device according to the manufacturer's instructions and aircraft policy.
- A forward-facing car seat must be installed facing forward.
- Only infants weighing less than 10 kg may use both forward-facing and rear-facing car seats.
- A rear-facing car seat must be installed in a bulkhead seat. If no bulkhead seat is available, it must be installed facing forward.
- The seat belt must remain easily accessible and must not be used to attach the infant inside the car seat.
- The aircraft seat back must remain upright.
- Any car-seat table attachments must be removed during take-off and landing.
- Cabin crew may assist with armrests and explain safety requirements.
- Cabin crew may prohibit car seats that do not meet Emirates' standards.

Car seats that require a three-point seat belt or shoulder harness for installation are not accepted.

Car-seat safety standards

Airport staff check that the car seat has an aircraft-approval label and instructions for use.

Emirates lists the following accepted standards:

Standard	Requirements described in the source

US FMVSS No. 213	Must have been manufactured to the standard on or after 26 February 1985 and display the required red-lettering labels
Canadian CMVSS No. 213	Child Restraint Systems
Canadian CMVSS No. 213.1	Infant Seating and Restraint Systems
European standards	Orange label marked ECE R44 04 or 03, or ECE R129
German TÜV	Approved under Qualification Procedure for Child Restraint Systems for Use in Aircraft, TÜV Doc. TÜV/958-01/2001
Australian/New Zealand	AS/NZS 1754

If a car seat does not meet these standards, it may be checked into the aircraft hold with other baggage.

Accepted restraint harnesses and devices

Emirates accepts the following restraint harnesses and devices, subject to the applicable restrictions:

- Amsafe CARES.
- Amsafe Special CARES.
- Crelling/Houdini Model 27.
- Meru TravelChair.
- Leckey Firefly GoTo Seat.

These devices have undergone risk assessments to check compatibility with aircraft seats and seat belts.

Device	Maximum height	Maximum weight	Age limit	Permitted cabin classes
Amsafe CARES	Up to 101 cm	20 kg	Not specified	All except First Class
Amsafe Special CARES	Up to 182 cm	No limit specified	Not specified	All except First Class
Crelling/Houdini Model 27 ISB/I (black)	Not specified	Not specified	Up to 5 years	All except Business and First Class
Crelling/Houdini Model 27 ASB/A (blue)	Not specified	Not specified	5–8 years	All except Business and First Class
Crelling/Houdini Model 27 BSB/B (black)	Not specified	Not specified	9 years to adult	All except Business and First Class
Meru TravelChair	Not specified	35 kg	3–11 years	All except Business and First Class
Leckey Firefly GoTo Seat Support Size 1	Not specified	15 kg	1–3 years	All except Business and First Class
Leckey Firefly GoTo Seat Support Size 2	Not specified	30 kg	3–8 years	All except Business and First Class

Emirates does not provide these harnesses or devices on board. Passengers must contact the nearest Emirates Contact Centre at least 48 hours before travel, because these devices can only be used in approved seats and certain cabins.

When is a restraint harness required?

Passengers must be able to sit upright in the aircraft seat. If they cannot, they must have an aviation-approved harness or restraint and travel with an assistant who:

- Is at least 16 years old.
- Is physically and mentally able to care for the passenger, including during emergency evacuation.
- Sits in an adjacent seat.

If a passenger is travelling alone, cannot sit upright, and does not have a harness, Emirates may arrange a stretcher. Passengers must contact Emirates 48 hours before departure.

Travelling with an assistant

Passengers travelling with a harness must travel with an assistant and complete the Medical Information Form (MEDIF).

A responsible adult must sit next to the passenger using the restraint device.

The adult or assistant is responsible for fitting the device according to the manufacturer's instructions and ensuring that the passenger is secured correctly. The passenger's lap belt must also remain fastened securely.

Emirates accepts devices at the airport only if all conditions are met and the device appears on the approved list.

For itineraries involving other airlines or codeshare flights, the operating carrier's rules apply. Passengers should confirm device acceptance with that carrier.

Additional restrictions:

- Emirates accepts only CARES and Special CARES devices made by Amsafe.
- If a passenger exceeds the CARES harness height or weight limits and has a connecting flight with a US airline, an FAA exemption may be required before travel to or from the USA.
- The source states that FAA certification is not applicable to use on Emirates flights because Emirates is a foreign carrier. Emirates instead follows its GCAA-approved internal risk assessment.

Medical travel privacy

Sections of the Emirates process may request personal information through MEDIF forms, FREMEC applications, and doctors' statements.

Passengers should consult Emirates' Medical Travel Privacy Notice for information on how their personal information is processed.

3.3 Baby Bassinets

Emirates bassinets are designed for babies:

- Up to two years old.
- Weighing up to 11 kg (24.2 lb).

A bassinet cannot be provided if the baby does not fit safely, for example, if their legs must bend to fit inside it.

Cabin class	Bassinet dimensions
First Class	63.5 cm long × 28 cm wide (25 × 11 inches)
Business Class	74.93 cm long × 33.03 cm wide × 16.51 cm deep (29.5 × 13 × 6.5 inches)
Economy Class	74.93 cm long × 33.03 cm wide × 16.51 cm deep (29.5 × 13 × 6.5 inches)

Bassinets are limited in number and subject to availability. Passengers who have booked a normal seat at a child's fare cannot request a bassinet.

3.4 Leg Rests, Seat Extensions, Ride-On Suitcases, and Sleepers

Are leg rests and seat extensions allowed on board?

No. Leg rests and seat-extension devices are not permitted to be used on board Emirates flights because they are not certified by the UAE's General Civil Aviation Authority (GCAA) and pose a safety risk as loose cabin items.

Examples include:

- Bedbox.
- Fly Legs-up.
- FLY-Tot.
- Plane Pal.
- Sky Rest.

These items may be carried on board only if they meet the regular carry-on baggage requirements and are stored in the overhead locker without being used during the flight.

Are ride-on suitcases allowed?

Ride-on suitcases may be carried on board if:

- They meet the size and weight requirements of the passenger's carry-on baggage allowance.
- They are stored in the overhead locker.
- They are not used during the flight as leg rests or seat extensions.

Examples include:

- Trunki.
- Zinc Flyte.
- Kiddee Case.
- FOME.
- Jetkids.

Which sleepers are allowed?

The only comfort device or sleeper permitted for use on board Emirates flights, according to the supplied source, is CoziGo (Fly Babee).

Conditions:

- It may be attached to an Emirates bassinet only in Economy Class, Premium Economy, and Business Class.
- A bassinet must be reserved before the flight.
- CoziGo is not provided by Emirates.

The following sleepers and similar devices are not permitted for use on board:

- Cocoonababy.
- Flyebaby.
- SkyBaby.
- TravelSnug.
- MonkeyGo.
- BedBox.

- Kooshy Kids.

3.5 Ticketing Rules for Children and Infants

Infants aged 0–1 year

Tickets for infants travelling on a parent's lap or in a bassinet are discounted from the full adult fare.

When booking online, passengers can request a bassinet in the Passenger Details section.

Infants less than seven days old are permitted to travel only in the circumstances specified by Emirates:

- Emergency medical travel in incubators.
- When the mother is travelling on compassionate grounds.

Children travelling in car seats

Children may travel in a car seat if a separate seat has been purchased.

The car seat:

- Can be used during all phases of the flight, including take-off and landing.
- Must be forward-facing.
- Must be secured using the aircraft seat's lap belt, not a shoulder harness.
- Must be approved by Airport Services at check-in.

Children aged 2–11 years

Children travelling in their own seats receive a child fare discounted from the full adult fare.

The Unaccompanied Minors service cannot be combined with a discounted child ticket. A full adult fare must be purchased for children travelling under this service.

Passengers should contact their local Emirates office to book an unaccompanied minor.

Children travelling in a different cabin class from their parents

Children aged 5–11 travelling in a different cabin class from their parent or guardian are considered unaccompanied minors and must travel on an adult fare.

They are considered accompanied only when travelling in the same cabin class as a passenger over 16 years old.

Emirates asks passengers to keep visits between cabins to a minimum for the comfort of other passengers.

Important rules when an infant turns two during the journey

Any passenger aged two or older must occupy a seat when travelling on Emirates.

The following rules apply:

- If an infant turns two after the journey begins, the applicable child fare and a seat are required for the remaining journey.
- If a passenger travels as an infant on the outbound journey and as a child on the return journey, the infant fare applies to the outbound journey and the child fare applies to the return flights.
- This type of booking cannot be completed online and must be arranged through a local Emirates office.
- If the passenger is already two years old on the travel date at the point of origin, the applicable child fare applies to the entire journey.
- If this has not been arranged during booking or ticketing, check-in staff will make the necessary arrangements at the airport.
- If seats are unavailable, the adult and child may be booked on alternate flights, subject to availability.
- If travel plans change and an infant turns two after travel has commenced, unused ticket coupons will be reissued at the applicable child fare for the remainder of the trip, and a seat will be booked for the remaining flights.

Additional condition: Two infants may travel with two accompanying adults if suitable seating and oxygen masks are available.

Important information for travel to Canada with children

Parents travelling to Canada with children under 18 are strongly advised to carry documents proving their relationship to the child.

Separated or divorced parents should also keep legal and relevant custody documents available.

Children travelling alone or with an adult who does not have legal custody are strongly advised to carry a travel consent letter signed by their legal guardian or a parent with legal custody.

The letter should include:

1. Authorisation to travel.
2. The destination in Canada and length of stay.
3. The signer's address and telephone details.

4. Accessible Travel

4.1 How do I arrange accessible travel or special requests?

Passengers who require accessible travel arrangements or special assistance should contact their local Emirates office.

Emirates states that it will make every effort to accommodate passengers' needs.

For more information, passengers should consult the official Accessible Travel page.
